

Getting to Know Your Benefits for Contraceptives

Many insurance plans pay, partially or in full, for contraceptive devices. It is our recommendation that you contact your insurance company to learn how this is covered.

Based on our experience, our insurance staff has put together a list of helpful information to help you make this call.

Reason – There are two reasons why you would be having this placed. Is it for birth control (pregnancy prevention) or for a medical reason (menstrual bleeding issues, pelvic pain, endometriosis, painful periods)?

Benefit – Contraceptives can fall under your preventive or medical benefit. You will want to tell your insurance company which device you plan to have. You also want to ask for both insertion and removal benefits. Your insurance company will provide you with any costs that may be your responsibility such as a co-pay, co-insurance, or deductible.

Place of Service - Your insurance company may ask where this will be done. While we know you are coming to Women's Care clinic, what you need to share with the insurance company is that this will be done in an office setting.

There are many contraceptive device options available to you that include: Mirena (J7298), Skyla (J7301), Kyleena (J7296), (Paragard, (J7300) Nexplanon (J7307) and Depo Provera (J1050).

If your insurance plan does not cover these services please contact our office to discuss the cash pay options we have available.

If you have any additional questions please call our knowledgeable staff at (920) 729-7105.
